\*\* Possible add-on charges

Legend:

(1) Provide total volume in mL and total time in hrs

## GENERAL REQUISITION

### Transport Temperature

(A) = Ambient (R) = Refrigerated (F) = Frozen

### SPECIMEN KEY

A1	ACT 1	G/LPT	Gold Top Tube (serum separator tube, SST) - Centrifuge, Light Protect	OC	Occult Blood Card
AAS	Aerobe/Anaerobe Swab	INSTRU	See collection instructions in the directory of services	OP	Ova & Parasite Kit
APT	Aptima Swab	ISO	Isolator Tube	Quant	QuantiFERON Red Top Tube - Do not Centrifuge QuantiFERON Gray Top Tube - Do not Centrifuge QuantiFERON Purple Top Tube - Do not Centrifuge
BFP	Blue Top tube/Spin Aliquot Plasma and Freeze	L	Lavender	RA	Plain Red Top Tube - Centrifuge, Aliquot Serum
BT	BacT/Alert, Aerobe, Anaerobe	LA	Lavender/Spin, Aliquot Plasma	RU	Random Urine
BWB	Blue Top Tube - Do not Centrifuge or Refrigerate	M5	M5 with flocced swab	SSC	Sterile Screw Top Container, 90 ml
CBT	Cary Blair Transport	NSW	Green Cap, Liquid Stuart Nasal Swab	U24	24 Hour Urine
CSF	CSF tube			UCT	Urine Culture tube
G	Gold Top tube/Spin				
GFA	Gold Top tube/Spin Aliquot Serum and freeze				

### PANELS

NOTE: All panel constituents can be ordered separately.

<b>Acute Hepatitis Panel</b> (panel includes Hepatitis A IgM Antibody, Hepatitis B Core IgM Antibody, Hepatitis B Surface Antigen, and Hepatitis C Antibody)
<b>Cardiac Profile</b> (profile includes Total CK, CKMB Index and Troponin i)
<b>Hepatic Function Panel</b> (panel includes Albumin, Total Protein, A/G Ratio, Total Bilirubin, Direct Bilirubin, Alanine Transaminase (ALT), Aspartate Transaminase (AST) and Alkaline Phosphate)
<b>Hepatitis Panel Comprehensive</b> (panel includes Hepatitis A Total Antibodies, Hepatitis A IgM Antibody, Hepatitis B Surface Antigen, Hepatitis B Surface Antibody, Hepatitis B Core Total Antibodies, Hepatitis B Core IgM Antibody, Hepatitis C Antibody)
<b>Hepatitis Panel - Chronic</b> (panel includes Hepatitis A Total Antibodies, Hepatitis B Surface Antigen, Hepatitis B Surface Antibody, Hepatitis B Core Total Antibodies, Hepatitis C Antibody)
<b>Immunoglobulin Profile</b> (panel includes IgA, IgG, and IgM)
<b>Renal Function Panel</b> (panel includes Sodium, Potassium, Chloride, Carbon Dioxide, Anion Gap, Glucose, Blood Urea Nitrogen, Creatinine, BUN/Creatinine Ratio, Calcium, Phosphorous, and Albumin)

### Medically Necessary Tests

Medicare generally does not cover routine screening tests; Medicare will only pay for those tests that are reasonable and necessary. Tests ordered pursuant to panels and/or profiles should be reviewed to ensure that all of the tests are medically necessary. Diagnosis codes should be reviewed to ensure that they accurately reflect the patient's condition and supports the medical necessity of the tests ordered.

### CPT Codes, Reflex Testing and Confirmation

For the most comprehensive, up-to-date listing of CPT coding guidelines, please consult the med fusion's Web site: [www.medfusionservices.com](http://www.medfusionservices.com). In some circumstances, based on a test result, we will reflex to additional testing as specified in the Directory of Service. If a test is reflexed for further testing, additional or different CPT codes may be added and charges for the added tests will be billed to the payer specified.

### Reportable Diseases

Positive findings for reportable diseases are reported by med fusion to State and/or Local Health Departments in compliance with Communicable Diseases surveillance and control regulations.

### Specimen Transport

Please call Client Services (972) 966-7300 / 855-500-5835 for information on Courier Services in your area.

### Shipping Locations

Send overnight delivery (FedEx) packages to:  
med fusion  
2501 S. State Hwy 121 Business, Suite 1220  
Lewisville, TX 75067  
(972) 966-7300 / 855-500-5835

### Packaging Instructions for Diagnostic Specimens

Shipping regulations require that specimen packaging include the following:

1. Watertight primary receptacle.
2. Watertight secondary packaging with biohazard labeling. Either the primary or secondary tube must pass a pressure test.
3. Absorbent material (desiccant) placed between the primary receptacle and the secondary packaging.
4. Sturdy outside packaging constructed of corrugated cardboard, wood, metal, or plastic with appropriate labels, i.e. dry ice, UN3373 Biological Substance, etc.

Please call Client Services (972) 966-7300 / 855-500-5835 for shipping supplies or any other questions concerning how to package and ship samples to med fusion.

### Specimen Temperature

med fusion lists the critical specimen temperature requirements for each assay in the Directory of Service. If no temperature is specified, store and ship specimens at ambient (room) temperature.

Please note that temperature ranges are as follows:

- (F) Frozen (dry ice) - 20° C or Colder
- (R) Refrigerated (cold pack) + 2° to + 8° C
- (A) Ambient (room temperature) + 18° to + 26° C

If you have questions, want to order copies of the Directory of Service, requisitions, packaging supplies or would like additional information on a specific assay, please call Client Services (972) 966-7300 / 855-500-5835.

All tests must be ordered by calling med fusion Services at (972) 966-7300 / 855-500-5835. Assistance, including collection requirements and courier arrangements, is available 24/7/365.
